

*Striving to be the customer's preferred supplier through consistently delivering a product and service that exceeds expectations.*

We offer a range of services for all your power generation needs. We are trained, tooled and equipped to service a complete range of generators from Volvo, Scania, Perkin, Cummins and many more. Our service team are happy to tailor your service contract to suit your individual needs.

Our ever-growing client base demand specialist skilled engineers to provide a better level of service. ECO Technologies are proud to say that we have over 50 years of combined service experience thus leaving our customers with the satisfaction that their service requirements are in professional hands.

### Services Available:

- Annual Service and Maintenance contracts.
- Engine repairs and overhauls.
- Fuel treatment
- Alternator repairs.
- Control system troubleshooting and repair.
- Load-bank testing.
- We stock a wide range of spare parts and service materials to keep your generator in peak condition and ready for work.
- We provide a 24hr call out service 365 days a year giving you peace on mind at all times.

Spare parts are an integral part of service and we keep a comprehensive stock of common parts to equip our service team and provide a more responsive service. We carry out all our work to the highest quality as our customers have come to expect.

Please contact our service department today for all your generator service needs. We are available round-the-clock to ensure your power is there when you need it.
